EDUCATION

B.Tech

Government Engineering College Wayanad

2014 - 2018

Courses

- Electronics and Communication Engineering

PROJECTS

Weather Application

- A responsive web application built with Next.js and styled with Tailwind CSS that fetches and displays current weather information based on user city search.
- Key Technologies:** Next.js, React, Tailwind CSS, OpenWeatherMap API.
- Key Features:** Integrated with the OpenWeatherMap API to fetch current weather data, including temperature, humidity, wind speed, and weather conditions. Implemented a location search functionality and displayed detailed weather forecasts.
- Link:** <https://weather-app-two-eta-79.vercel.app>

Movie Application

- A web application built with Next.js and styled with Tailwind CSS that allows users to browse and search for movies, TV shows, view details, and discover information.
- Key Technologies:** Next.js, React, Tailwind CSS, TMDB API, JavaScript, HTML.
- Key Features:** Implemented dynamic routing with Next.js for seamless navigation between movie details pages. Integrated the TMDB API to fetch and display real-time movie data and images.
- Link:** <https://movie-app-liart-six.vercel.app>

Personal Portfolio Website

- Developed a dynamic and responsive personal portfolio website using Next.js and Tailwind CSS to showcase my front-end development skills, projects, and experience. Includes sections for my skills, professional background, and contact information. Implemented a clean and modern design using Tailwind CSS, ensuring a consistent and visually appealing user experience across all devices.
- Key Technologies:** Next.js, Tailwind CSS, Vercel (for deployment)
- Link:** <https://portfolio-app-two-delta.vercel.app>
